

HPI Series

High Pressure Compressor Solutions

Pressures - 2175 to 6000 psig
Capacities - to 25 scfm

Gardner Denver is a globally recognized leader in the design of innovative and high quality compressed air systems and solutions. Our **HPI series** compressor package incorporates our reliable 3 and 4 stage industrial compressor blocks which are uniquely packaged into a vertical sound attenuating enclosure. This is yet another example of our commitment to delivering the very best to our customers.

Standard Features:

- Industrial-duty, 3 or 4 stage compressor block
- Full enclosed, sound attenuating enclosure with heavy-duty powder-coated finish
- Hinged and removable panels to allow quick access to routine maintenance items
- Anti-vibration mounts
- Auto drain with muffler / reservoir system for collection of condensate
- ODP, IP12 rated electric motor
- UL listed, NEMA 4 electrical enclosure
- Fully automatic control system
- Instrumentation and controls:
 - Illuminated on/off push buttons
 - Emergency stop button
 - Hours run meter
 - Inter-stage and final stage pressure gauges
- Individual shut-down indicators for high air temperature, high air pressure, and low oil level / pressure

Optional Equipment:

- Cartridge type air dryer

Dimensions:

HP04, HP05, HP07:	66" (H) – 42" (D) – 31 ¼" (W)
Weight:	1200 lbs.
HP09:	66" (H) – 50" (D) – 31 ¼" (W)
Weight:	1300 lbs.
